Title. Ownership. Due Diligence.

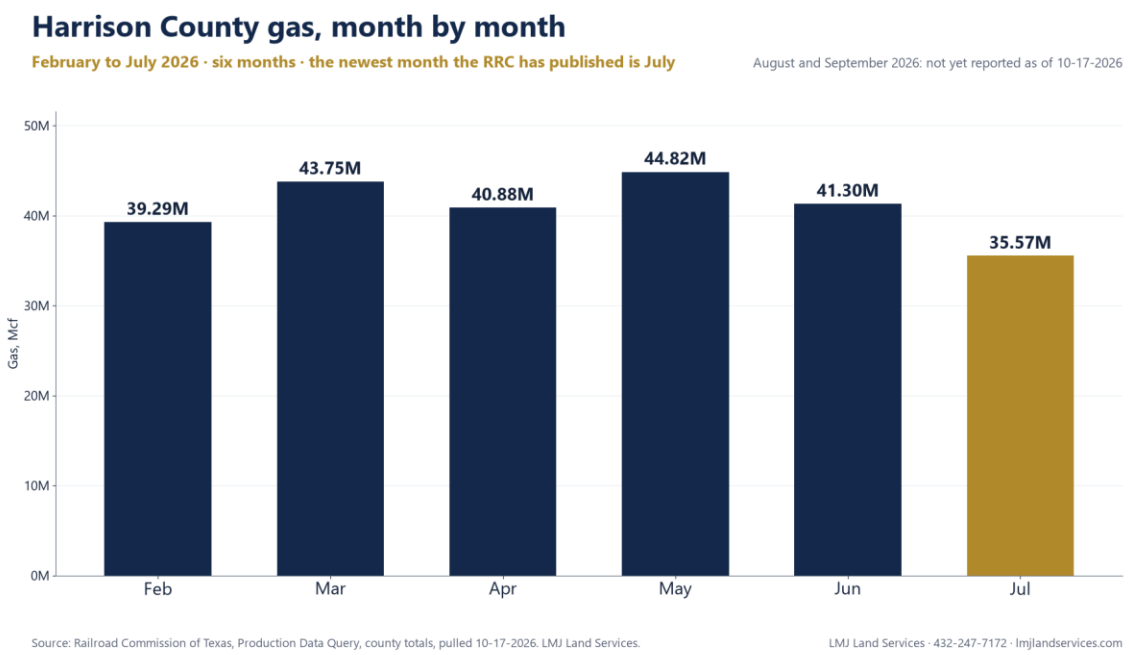

Step 1. See which months the RRC has published

Open the RRC Production Data Query, pick Initial View: County, County: HARRISON, and set Jan 2026 to Sep 2026. Submit. July 2026 is the newest month with numbers. August and September come back as zero because production is reported months late, not because nothing was produced.

RRC Production Data Query, Harrison County, Jan-Sep 2026, pulled 10-17-2026. Aug and Sep 2026: not yet reported.

Open the RRC Drilling Permit (W-1) query. County: HARRISON, Status: Approved, approved date 07/01/2026 to 07/31/2026. Count the rows with Amend = Yes separately: those are amended permits, not new ones. July 2026: 9 new and 5 amended.

Step 4. The operator spotlight and the top leases

From the operator view, open each operator's Lease view to see its leases. Sort by gas for the top producing leases.

Period: July 2026. Operator of record as reported to the RRC, not a leasehold ownership figure. Pulled 10-17-2026.

The routine

1. Check which months are published before you name a period.
2. Operator view for the newest month; View All so nobody is cut off.
3. W-1 query by approved date; count amended permits apart from new ones.
4. Lease view by operator for the top leases.
5. Spot-check two or three leases on the RRC's own lease page.

The trap

A zero for the newest months is not a zero month. It is a month not yet reported. And a lease that crosses a county line shows only this county's share in the county query, so its lease page on the RRC will show a bigger number. Both are normal. Name the period you actually have.
